

Remote Meter Reading Solutions- Unwired

REMOTE METER READING SOLUTIONS - UNWIRED

Are you looking for a SIMPLE remote meter reading solution?

Allflow Supply can provide hardware (including meters) or supply and installation (complete turnkey).

With a range of individual system options, we have the solution for your application.

Radio Reading

Using our short radio reading Modules, allows hard to read meters to be read from the car. The system utilizes a radio receiver and PDA to collect readings.

Ideal for

- * Medium to large sites with 50 to 10,000 meters
- * Suitable for retrofit installation where installing cabling is costly

WMR001	Meter Transponder
WMR101	Radio Receiver
WMR202	PDA and Software

GSM (Cell) Monitoring

Using this state of the art **Monita R** product, is like attaching a mobile phone to your remote water meter or alarm. The **Monita R** has four (4) inputs and can monitor everything from simple pulse water meters to the alarm panel on your factory.

The **Monita R** is self powered and can send its output via SMS to mobile phone, or email. The **Monita R** can be used to send monthly meter readings or alert of an intruder at a field site.

Ideal for small sites with 1 to 4 meters.
