

Dual Service Meter Box

DUAL METER BOX

Nominal Size 2 x 20mm.

Dimensions 600mm(L) x 450mm(W) x 300mm(D).

Standards Meter Connections to Meter Thread AS 3565.

Maximum Working Pressure 1,600 Kpa.

Box Base included to ensure stable footprint

Features

- * Pre assembled.
- * Full DZR Brass fittings .
- * Lockable inlet ball valve.
- * Fully serviceable on site .
- * Colour coded fittings denoting potable and recycled supply pipes.
- * Standard meter coupling connections.
- * Extendable coupling allowing easy fit of meter.

Benefits

- * Long Service life components
- * Reduced Installation costs
- * Fast Service connection and meter installation / Replacement.

The Dual Meter Box can be used in two applications; for dual services to a single property (potable and recycled meters), and as a dual service installation servicing two adjacent properties (2 x potable meters).

The Dual Meter Box provides for controlled inlet connection points for mains layers, and two controlled outlet connections for house connections.

It has been developed to improve uniformity, remove the chance of potable and non-potable interconnection, and reduce the installation costs for dual meter services.
